In the best package—Clean, bright aluminum

Better Health In 1929

A year or two after the close of the Great War, and when it was organizing its peace programme for "the improvement of health, the prevention of disease, and the mitigation of suffering," the Canadian Red Cross Society launched a monthly magazine for the purpose of arousing public interest in the matter of individual, community, and national health. With the end of 1928 publication of this little periodical ceased, and in announcing the cessation of publication, the Red Cross stated that in the intervening years the subject of health improvement and disease prevention had made such giant strides, and so many organizations and publications were devoting their energies to the subject, while almost every daily and weekly paper regularly printed health articles, that the same necessity did not exist for the Red Cross magazine, consequently the money it cost to produce could be devoted to other purposes.

There has certainly been a gratifying increase in public interest in health matters in the years following the war. With all its awfulness tragedies and enormous loss, the war at least served the purpose of advancing the cause of health. Today, Canada is probably the healthiest country in the world, but, even so, there is still vast room for improvement, and that improvement cannot be brought about alone by medical men, governments, hospitals, and health organizations. It rests largely with the individual.

In the past it has been true to a great extent that people only became actively interested in their health when they became sick, notwithstanding the fact that every intelligent person will frankly admit that prevention is better than cure. In all industry in this age special efforts are directed at the elimination of waste and all unnecessary costs in business. Yet loss of time, loss of efficiency, loss in production, loss of earnings by the employee and of profits by the employer, loss occasioned by increased expenses at the very time when income is decreased or stops, is the direct result of sickness. It is the cause of the greatest aggregate loss in our national life.

No better New Year resolution can be made, or observed, by the individual, or the community, than one which finds expression in a determination to safeguard health. Such a resolution finds added force at this particular time when an epidemic of influenza is again sweeping the continent, although, fortunately, of a milder type than those of some years ago. Influenza is very contagious, but, on the other hand, it can be easily combatted through the taking of very simple precautions. If it is not so combatted at its inception, it may quickly result in serious complications such as bronchitis, intestinal trouble, or pneumonia.

All health authorities are alive to the danger; so, too, are the life insurance companies, and all are engaged in extensive publicity campaigns to acquaint people of the danger and to make known to them the simple precautions they should exercise. Thousands of dollars are being spent in newspaper advertising and other forms of publicity, and it is money well spent, but it will, nevertheless, be largely wasted unless the masses of the people to whom these appeals and advice is directed profit by it.

This new year of 1929 cannot be a happy, prosperous year if sickness enters the homes of Canada, followed by death carrying off loved ones, or leaving members of the family weakened and liable to contract other forms of disease. Good health is the first essential to happiness. Without it no person, community or nation can be prosperous.

The Canadian people cannot render better service to themselves and their country than by giving immediate and constantly continuing attention to their health. By so doing they will be laying the only sure foundation to happiness, prosperity, progress.

League Of Nations

Coast To Coast Membership Drive To Take Place In April

The weekly and daily newspapers of Canada are warm supporters of the League, it was stated at the regular monthly meeting of the League of Nations Society held in Ottawa, when arrangements were discussed for the membership drive to take place next April. Throughout the length and breadth of the Dominion, it was said, editors have shown an interest in the activities of the League of Nations and in the efforts of the Society to promote it in this country. The support of the press will prove a great asset in the annual "Coast to Coast" Membership Drive due to take place on April 10th, 1929, which will be known as "League of Nations Day."

Testing Canada's Fuels

The Department of Mines has erected in Ottawa a new Fuel Research Laboratory building, which has been equipped with modern instruments and machinery for conducting extensive research on Canadian fuels—solid, liquid, and gaseous.

No man or woman should hobble painfully about because of corns when so certain a relief is at hand as Holloway's Corn Remover.

Passenger automobiles made in Germany this year number one-third more than last year.

Stern Wheel Steamboats

Last Of Picturesque River Boats Has Disappeared In B.C.

The Fraser River has seen the last of its picturesque stern wheel steamers which until now have formed a link with the romantic past, the Cariboo gold stampede and other notable events in the early history of British Columbia. The old steamer Skeena has been sold as a cannery tender, and will be used as a bunkhouse for fishermen. She will no longer navigate the shallows and treacherous canyons of the mighty Fraser, and she was the last of her line. Stern wheelers first commenced to operate on the Fraser in 1859.

Every careful and observant mother knows when her child suffers from worms. She also knows that if some remedy be not speedily applied much harm will result to the infant. An excellent preparation for this purpose is Miller's Worm Powders. They drive worms from the system and set up stimulating and soothing effects, so that the child's progress thereafter is painless and satisfying.

Missionary (to cannibal)—I warn you in regard to eating my brother. He will give you indigestion. He never agrees with anybody.

Minard's Liniment is good for colds.

Mink farming is rapidly developing in Alaska.

Cuticura Heals Annoying Rashes

Bathe the affected parts freely with Cuticura Soap and hot water, dry without rubbing, and anoint with Cuticura Ointment. This treatment not only soothes and heals rashes and irritations but tends to prevent such conditions.

Sample Each Free by Mail. Address Canadian Depot: "Star," Toronto, Ont. Price, Soap 25c. Ointment 15c and 50c. Telum 25c.

Grand Champion Steer

Alberta Steer Is Sold For a Net Sum Of \$1,250

A new record was set for Alberta in the disposal of MacKenzie Brothers, of Lacombe, of Earl Marshall, the steer which recently won the grand championship at Vancouver for a net sum of \$1,250. This steer which was bred by a Prince Marshall bull, owned by S. Henderson of Lacombe, weighed 1,250 lbs. and was purchased by Jackson Brothers, of Vancouver, at \$1 per pound—the highest price ever paid for an Alberta fed steer.

WEAK, LISTLESS GIRLS

Need Such A Tonic As Dr. Williams' Pink Pills To Restore Health

When a girl in her teens becomes pale and listless, especially if at the same time she shows inclination to tire easily, a listlessness and inattention to her work or studies, she needs Dr. Williams' Pink Pills, a tonic which directly and specifically corrects the condition from which she is suffering. A chemical analysis of the blood of such a girl would show it to be deficient in just the elements Dr. Williams' Pink Pills can supply. But an analysis of the blood is not needed—the physical signs are a pallor of the cheeks and lips, dark circles under the eyes, easily tired and breathless after slight exertion. Poor appetite, headaches, and sometimes fainting spells follow; often the patient is nervous and is startled at the least noise. In all run-down conditions there is no other tonic will build you up so quickly and so surely as Dr. Williams' Pink Pills. The statement of Miss Dorothy Lumbin, Bush Island, N.S., will bring home to other weak girls. She says: "I wish from my heart I could persuade every person who is in a run-down condition to give Dr. Williams' Pink Pills a trial. About a year ago I was a weak girl suffering from impoverished blood and a run-down system, with many of the attendant symptoms. I had often read of Dr. Williams' Pink Pills and decided to take them, and after using six boxes I feel as well and strong as ever. Dr. Williams' Pink Pills will be my standby in the future if ever my blood needs building up again, and I shall always find pleasure in recommending them to others."

You can get these pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Recipes For This Week

(By Betty Barclay)

SCALLOPED CORN AND CELERY

2 cups corn (canned or fresh cut).
1 cup celery (finely chopped).
1 cup buttered dry bread crumbs.
1 teaspoon salt.
1 small green pepper chopped.
2 tablespoons butter.
1 cup hot milk.

Arrange corn, peppers, celery and crumbs in two alternate layers in a buttered baking dish. Add butter to hot milk and pour over the vegetables. Cover with buttered crumbs and bake 30 to 40 minutes. Serves eight.

RICE WITH DATES

1 cup rice.
3 cups boiling water.
1 teaspoon salt.
1 cup dates.

Wash rice and add to boiling water. Add salt and boil 5 minutes. Cook in double boiler 30 minutes. Add dates, cut in pieces, and cook until rice is tender and all the water has been absorbed. Serve hot or cold with milk or cream.

Quite Simple

"Yes," said the timid passenger to the airplane pilot, "I understand I'm to sit still and not be afraid and all that, but tell me, if something happens and we fall what do I do?"

"Oh, that's easy," said the pilot. "Just grab anything that we're passing and hang on."

The cheapness of Mother Graves' Worm Exterminator puts it within reach of all, and it can be got at any druggist's.

Canada's Dairy Herds

One million, four hundred and ninety thousand, three hundred and forty cows supplied milk to creameries in Canada during 1928.

For frostbite use Minard's Liniment.

She: "A fortune teller says I have a lot of money coming to me."
He: "It may be true, it may be—but I would rather hear a paying teller say that."

Life is terribly short, considering it takes the average person fifty years to accumulate just a little bit of sense.

Canadian Firm Gets Contract

Will Supply R.C.A.F. With Moth Planes To Be Assembled In Canada

The de Havilland Aircraft of Canada Limited, has received notification from the director of contracts, of the Department of National Defence that their tender for the supply of Moth aircraft for the re-equipment of the Royal Canadian Air Force had been accepted.

An order was placed immediately for thirty-four two-seater Moth light aeroplanes, twenty-eight being landplanes for the re-equipment of the Camp Borden station. These machines which will replace the old "Lynx Avros" at present in use, will be used for the training of personnel of the force and for the annual flying courses for probationary flying officers who attend during the summer months. The remaining machines are Moth seaplanes for the equipment of the station at Vancouver.

It is a significant fact that all these machines are to be equipped with the Handley-Page automatic safety ailerons which render an aeroplane as nearly fool-proof as possible.

The Moths will be of the latest metal fuselage type which has been specially evolved for Canadian flying conditions and recently passed all tests at Ottawa with flying colors.

The order includes six spare Gipsy engines and approximates in value almost \$200,000.

The Moths will be partly manufactured in England, but assembled and tested at the de Havilland Company's plant at Mount Dennis, Ont. Delivery is to be completed by March 31.

Immigration To Canada

Increase Reported For 1928 Over Previous Year

Immigration to Canada from April 1 to November 30, 1928, totalled 128,598, compared with 124,362 for the corresponding period in 1927, an increase of 4,236 or 11 per cent. Of the total of 128,598, British numbered 49,449, United States, 23,329, Northeastern Europe, 23,633, and other countries 42,187.

In the eight months under review 25,801 Canadians returned to the Dominion from the United States where they went intending to remain permanently, and now intend to remain permanently in Canada.

During November 1928, immigration to Canada aggregated 6,844, an increase of 940 or 16 per cent. over November, 1927. Of the 6,844, British were 2,059, United States, 1,955, Northwestern Europe, 1,389, and other countries, 1,441. Canadians returned to the number of 2,258 from the United States.

Canadian Wheat Pool

Fifty-one per cent. of the 209,871, 573 bushels of wheat handled by the Canadian Wheat Pool in the crop year 1927-28 was exported to 68 ports in 26 countries. Of the total exported 90.7 per cent. went to Europe, of which 31.5 per cent. was taken by the United Kingdom, the remainder going to several other countries. China and Japan took 9.2 per cent.

Experimental Farm System

The Canadian Government Experimental Farm system embraces 27 farms, seven sub-stations, one horse breeding station, one fox ranch, 10 plant pathological laboratories, and 201 illustration stations at different points in the nine provinces of the Dominion. The system is the largest of its kind in the world.

Alberta Phone System

The Alberta Government telephone department has installed over 250 'phones for grain elevator companies in 1928, and the total number of 'phones in service in grain elevators throughout the province is now 1,288.

Heavy Air Mail

Post office statistics show that 235,793 pounds of air mail were carried over the various routes throughout the Dominion up to the week ending December 8th.

Idealists should have more sense; sensible men need a little more of idealism.

Thrift Means Progress

Manufacturing Products From Farm Waste Shows Great Development

Professor O. R. Sweeney, of the Iowa State College, says that no less than 3,000 known industrial products can now be manufactured from such farm waste as corn cobs, cornstalks, oat chaff, cottonseed hulls, peanut shells, and straw. From various plants, trees and vegetables science is now making good substitutes for ivory, amber, leather, insulating materials and wool as well as explosives, silk thread, lacquers and photographic film.

Hydrogen, a by-product of wood pulp manufacture, can be passed through a soft fat or oil and produce a hard fat comparable in value to lard. "Bagasse," the residue of the cane from which syrup has been squeezed, is utilized in the manufacture of wall board. In countless other ways, this phase of thrift is developing, and all are participating in the benefits. Wherever there is thrift, there is progress, whether it be the individual carefully depositing his savings in a bank or a nation finding ways and means for turning into products of value materials that formerly were wasted.

Air Mail Service

The Air Mail Service operated by the Western Canada Airways Ltd., for the Canadian Post Office Department into mining districts of Northern Ontario and Manitoba this year was 100 per cent. efficient. One hundred and two trips to the camps were on the schedule and all were made without delay or the loss of a single piece of the 75,321 pounds of mail carried.

Large Yield Of Grain

Adeloid Hotte, whose farm is about a mile north of the Canadian Government Experimental Farm at Beaver Lodge, Peace River, Alberta, threshed 57 acres of Garnet wheat that averaged 49 bushels to the acre. The land on which the wheat was grown was semi-scrub and was broken in 1927.

Drives Asthma Before It. The smoke or vapor from Dr. J. D. Kellogg's Asthma Remedy gives asthma no chance to linger. It eradicates the cause. Our experience with the relief-giving remedy shows how actual and positive is the succor it gives. It is the result of long study and experiment and was not submitted to the public until its makers knew it would do its work well.

The Way It Is Done Here

Canada and the United States seem queer to Europe. When they want something from one another, they buy it instead of training soldiers to take it.—Portland Express.

You may have more than you need, but you never have more than you want.

It is said that people with the same shape of nose are not suited as matrimonial mates.

Two Hundred Mile Dog Derby Returns To North Country

Famous Mushers Will Race This Year From The Pas To the Flin Flon

After a lapse of four years, the endurance dog derby, which once thrilled the north country, and, it might even be said, the world, is returning to The Pas. The gruelling non-stop race which brought fame to Northern Manitoba and its hardy mushers will be revived at the frontier town's winter carnival, March 4 to 7. This time, romance will be added to romance. The course will be from The Pas to the famous Flin Flon mine and back, a distance of 200 miles.

Two thousand dollars in cash prizes, besides other valuable awards, and the Walter Goyne-Grant Rice memorial cup, which has an intrinsic value of \$1,000, will attract mushers from wherever mushers mush. The winner will have the dog racing championship of the world.

"Shorty" Russick, veteran driver, and the youthful, though none the less noted Emil St. Godard, present world's champion, each have a leg on the memorial cup. St. Godard will be one of the leading contestants this year, and it is likely that Russick will also enter. Other noted mushers are bound to make a strong bid for more fame at the derby since it has gone back to epic proportions. Seppala, Alaska's pride, has been itching for another endurance race, his friends say, and other mushers, from both the east and the west, have already sent in their applications for entrance forms.

Drivers are already training their teams for the test in March. St. Godard's dogs are in fine shape after a summer and a fall of workouts. The team of the French-Canadian musher had been trained for the speedier, 120-mile lap races of the last three years, but Emil claims that the dogs have the endurance for the longer route. They have been harnessed to an auto chassis in the warm months and are in good condition for the snow trail.

All the color, the lure, the joys and the sorrows of the land of the northern lights is crowded into the romantic history of dog racing at The Pas.

Happiness is not in getting what you want, but in not wanting what you can't get.

Turkey has been a feature of Yuletide fare since the sixteenth century.

Powerful Medicine.—The healing properties in six essential oils are concentrated in every bottle of Dr. Thomas' Electric Oil, forming one of the most beneficial liniments ever offered to the use of man. Many can testify as to its power in allaying pain, and many more can certify that they owe their health to it. Its wonderful power is not expressed by the small price at which it sells.

More than 2,100 miles of motor rail postal routes were started in Germany in the past fiscal year.

RICKETS

Children with weak bones or poor dentition receive great benefit from the use of

Scott's Emulsion

It is wonderfully pure, vitamin-rich cod-liver oil and helps build a strong, healthful body, sound bones and teeth.

Scott & Bowne, Toronto, Ont. 25-66

Standards Of Intelligence

Impossible To Measure Intelligence With A Foot Rule

Dr. Edward E. Free, a noted chemist, tells the American Society of Mechanical Engineers that mechanics are the most intelligent class in the nation. Second come engineers; third, business men. Last of all, but safely out of the category of morons, come actors, preachers, doctors and college professors.

And how does Dr. Free measure intelligence? It is "the ability to reach a reasonably correct conclusion from a set of discoverable facts." But of sets of facts there are all kinds and varieties. Perhaps Dr. Free would tend to over-emphasize the relative importance of chemical facts. Yet if so, one wonders why he ranks college professors so low in his scale. Surely such professors as Dr. Millikan and Dr. Compton should take high rank even on materialistic grounds. A physician like Dr. Banting, the developer of insulin, might be assumed to possess some degree of brain power and logical capacity.

Intelligence is imponderable. It is not to be tested with a foot-rule. It has as many standards as there are people to apply them. Because Shakespeare was an actor we should not be inclined to seat him below the salt at a banquet table of mechanical engineers, just one remove from the half-wits.—New York world.

CORNS

Relief in 2 Minutes

Just a drop or two of Putnam's Corn Extractor, and the pain goes away. Relief is almost instantaneous. Removing corns with "PUTNAM'S" is so easy, so sure, so painless—thousands use this wonderful remedy, and say it is the best. Don't suffer any longer, use Putnam's Corn Extractor, the one sure relief for sore corns. Sold at every drug store.

What She Reduced

Robert: "I'm never going to take Miss Townsend out to dine again. Too expensive."

Calvin: "Why, she told me she was reducing."

Robert: "She was. She reduced my bank-roll about 15 bucks!"

Russia, which stands third in the countries of the world as regards highway mileage, is thirty-fourth in the number of automobiles.

WINDOLITE

MADE IN ENGLAND

The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. **WINDOLITE** is supplied in rolls any length but in one width of 36 inches only. A square yard of **WINDOLITE** weighs about 14 lbs., while a square yard of glass of ordinary thickness, weighs about 135 to 150 lbs. The improved **WINDOLITE** requires no varnish. **WINDOLITE** is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Federal Parliament Will Assemble On Thursday, Feb. 7th

Ottawa.—Parliament will open on Thursday, February 7. Official announcement to this effect was made recently by Premier King, at the conclusion of a meeting of cabinet council.

The Prime Minister stated that no appointments to governmental vacancies were made at the sitting of the cabinet.

Hon. R. B. Bennett, Conservative leader, who is now in Europe, will return to the capital about the middle of this month. Mr. Bennett sailed for England two weeks before Christmas on a brief holiday prior to the opening of parliament.

Political prognosticators forecast that the session opening next month will be much livelier than the previous one. With occasional rumors in the air of a possible general election next fall, the likelihood is that debates in both the commons and the senate will be somewhat more spirited.

No intimation has been made in official circles, though, on the possibility of an election this year. Two general elections have been held in the Dominion during the past few years, one in 1923 and the last one in 1926; and there are many political observers who lean towards the opinion that no further appeal will be made to the people before 1930.

The budget, it is understood, will be brought down early during the coming session. Presentation of this document, containing as it does the government's fiscal policy with any changes to be made in the tariff, is always eagerly awaited.

Indications are that the coming session of parliament will run well into June. While the legislative program of the government has not been indicated, a number of important matters are definitely scheduled to come before parliament for necessary action.

Recently, Hon. Charles Stewart, Minister of the Interior, announced that a bill for the return of natural resources to British Columbia would probably be introduced in the course of the approaching session.

Negotiations for the return of natural resources to Alberta are also well advanced, and legislation may possibly be also introduced in this case during the session. Premier J. G. Gardiner, of Saskatchewan, is due to arrive in the capital early next month to discuss the question of the early return of natural resources to his province.

The whole question of the stimulation of immigration to Canada will likely receive attention.

Monoplanes Reach Hudson Bay Coast

Carried Supplies From Cochrane, Ontario, To Eight Prospectors

Winnipeg.—Two superb monoplanes of the Northern Aerial Minerals Exploration Company have arrived on the east coast of Hudson Bay, near Richmond Gulf, after a flight from Cochrane, Ont., where they left on Dec. 29. The planes were piloted by Captain H. A. (Doc) Oakes and Patrick Reid, who were accompanied by two mechanics. The purpose of the flight was to bring supplies to eight prospectors who have been stationed on the east coast of Hudson Bay since early summer.

New Commander For Rangers

Ottawa.—Included in the promotions announced by the department of national defense is that of Major E. Poole to the rank of lieutenant-colonel, and to command the Rocky Mountain Rangers, with headquarters at Kamloops, B.C. Vice-Lieut. Col. T. Aldworth, who has been transferred to the reserve of officers.

New Air Marshal Appointed

London, Eng.—Sir John Maitland Salmon, air marshal, has been appointed chief marshal of the Royal Air Force in succession to Sir Hugh Trenchard, who resigned December 20. Sir John Frederick Higgins, air vice-marshal, will be promoted to Sir John Salmon's rank.

Tempest In Japan

Tokyo.—Seven hundred houses were reported destroyed, 56 persons killed and scores injured by storms on the Kondo coast, southwest of Niigata. Information reached the railway department here that at least 20 villages were inundated by the high seas.

W. N. U. 1767

To Preserve Niagara Falls

Treaty Is Signed Between Canada and United States

Ottawa, Ont.—The construction of remedial works in the Niagara River designed to distribute the water so as to ensure at all times unbroken crests on both Canadian and American Falls, is provided for in a treaty between Canada and United States which was signed at the office of the Prime Minister here.

In addition to providing for the construction of these works, provision is also made that each country may divert an additional 10,000 cubic feet of water per second for power purposes. These diversions will be permitted only "during the winter or non-tourist season, beginning on the first day of October and ending on the 31st day of March of the following year."

The treaty was signed by Right Hon. W. L. Mackenzie King, acting in the capacity of plenipotentiary for his Majesty the King, and by Hon. William Phillips, United States minister to Canada, as plenipotentiary for his government.

Revising Regulations On Incoming Autos

Officials At Ottawa Welcoming Opinions On Existing Restrictions

Ottawa, Ont.—Business men of Western Canada are taking an active interest in the revision of the Customs regulations in regard to the entry from the United States of automobiles.

The Department of National Revenue has been engaged for some time in this re-drafting of these regulations with the purpose of removing objectionable restrictions on incoming automobiles, and such has been the interest of business men in the west that the work has been delayed temporarily until all representations have been received.

Many board of trades have written to the department, and the officials are welcoming every expression of opinion. Every effort will be made to so redraft the regulations that they will be acceptable.

Langsner Leaves Canada

Man Who Investigated Ambrose Small Case, Has Gone To West Indies

Toronto.—Dr. Adolph Maximilian Langsner, who investigated the Ambrose Small case here, some weeks ago, has gone to the West Indies and later will go to Mexico. These sections are presumably more sympathetic to his theories and methods than Canada, whose authorities, according to his own statement, exhibited a disinclination to renew his immigration permit as a visitor in this country.

As on his previous departure from Toronto, he promises to return, make sensational disclosures regarding the Small case, and "solve the mystery in spite of all they can do."

Influence was brought to bear by his enemies and opponents in the Small case, he said, before his departure, with the object of preventing him continuing his investigation of the mystery.

Early Seeding

Marquis Wheat Sown At Indian Head On January 2nd.

Indian Head, Sask.—Saskatchewan in past years has been noted for the creation of records, some of them strange and unusual, and on the second day of 1929, another was added, that will stand for some time.

This was the seeding of spring wheat, five acres of Marquis being planted on an experimental plot at the experimental station farm. At 1 o'clock, the superintendent ordered his men and teams out, and according to information given Wednesday afternoon, the five acres were seeded before dinner.

The land, summerfallow, was in excellent shape, and the wheat was buried to quite a depth.

British Members Nominated

London, Eng.—The British government has nominated Sir Josiah Stamp and Lord Revelstoke as the British members of the projected committee of experts on reparations. The names of the two deputy members will be announced later.

Was Pioneer Railroad Builder

Pat Welch, Well Known In West, Dies In California

Spokane, Wash.—Pat Welch, 70, member of the firm of Stewart and Welch, railroad builders, died recently at Coronado, California, a telegram to relatives here said. Mr. Welch, who had gone to California for his health last summer, had been ill for nearly four years.

Associated with Major General John Stewart, of Vancouver, B.C., Welch had a part of the construction of many railroads in the northwest with General Stewart, held many contracts in the United States, Canada, Great Britain and Africa.

The Flu Scourge

Epidemic Most Severe In Nova Scotia and Ontario

Ottawa, Ont.—Ontario and Nova Scotia are the two provinces of the Dominion where the ravages of the 'flu are most severe at present, declared Dr. J. A. Amyot, deputy minister of health, but the visitation of the scourge this winter is by no means as serious as those of 1918, 1919, and 1926.

The complications which accompanied the malady in those years have not been present to such an extent in the present epidemic.

ECONOMIC LIFE OF GERMANY IS REPORTED SOUND

Berlin.—Confidence in Germany's economic soundness is the dominant note in Agent-General Seymour Parker Gilbert's report for the fourth reparations annuity year made public Tuesday.

The report paints a complimentary picture of Germany's entire economic life. The agent-general testifies to Germany's punctilious payments of all sums due on the reparations accounts and describes Germany as placing the product of her science, skill and labor at the disposal of creditor nations in an effort to pay for the war.

With reference to payments for the current annuity year the report forecasts that "no question can fairly arise, in the light of practical experience thus far, as to the ability of the reich to provide the full amount of its standard contribution of the plan."

The report states that the payments and transfers during the year amounted to 1,739,000,000 gold marks (about \$140,000,000).

The report proceeds to show that the total annuity of the fourth year was almost one and three-quarter billion marks, of which France receives more than one billion (about \$250,000,000).

The list of creditors included France, Great Britain, Italy, Belgium, Yugoslavia, United States, Rumania, Japan, Portugal, Greece and Poland.

HEADS NATIVE SONS

Dr. James Cotton, president of the Native Sons of Canada, who express fear that Canada's new immigration agreement with Britain may bring too many settlers here, thereby increasing unemployment and driving Canadians to the United States.

Prisoners Help Fund For Distressed Miners

Heard Appeal Made By Prince On Christmas Day

London, Eng.—Evidence is fast accumulating of the added impetus given the lord mayor's fund for relief of families of distressed miners by the personal appeal of the Prince of Wales broadcast by radio on Christmas Day. The fund now amounts to nearly \$2,000,000 exclusive of the governmental contribution which is to double it.

The governor of a certain prison has sent along \$55 "from the prisoners who heard the Prince." Many letters received at the headquarters of the fund, the Mansion House, are addressed to the Prince personally.

Canada's Trade With U.S.

Best Customer Last Year Says Bulletin Issued At Washington

Washington, D.C.—Canada literally purchased a little of everything American manufacturers had to offer during the first ten months of 1928, and may have "bought the Brooklyn Bridge" if Uncle Sam offered such a structure for sale.

This makes the substance of "our world trade," says a bulletin issued by the foreign commerce department of the Chamber of Commerce of the United States. It stated that the Dominion was the best customer of the United States during the designated period.

Famous Analyst Dead

Ottawa.—Dr. Anthony McGill, M.A., B.Sc., LL.D., F.R.G.S., formerly chief Dominion analyst, is dead at his home in Berkeley, Calif., according to word received in Ottawa by relatives. His death occurred on Saturday, December 29. He was 81 years old. Dr. McGill was one of Canada's most prominent chemists and was an outstanding figure in scientific circles.

FAVORITE PHOTOGRAPH OF PRINCE

Here is reproduced a photograph of the Prince of Wales which was taken from the Illustrated London News. This picture is declared to be the best ever secured of the young man who recently returned from the big game haunts of Africa to the sick room of his father, King George.

Two Opposite Camps

Difference Of Opinions Within the Ranks Of Salvation Army

London, Eng.—For the first time both parties within the Salvation Army have openly admitted that the high council which will meet shortly was composed of two opposite camps.

Officials at the international headquarters and at the headquarters of Evangeline Booth, head of the Army in the United States, freely made pronouncements on the probable line-up of voting when the question of removal of General Bramwell Booth as commander-in-chief, and reorganization of the Army will come up.

An official of the Evangeline Booth group stated that after a careful canvass the group was satisfied more than the necessary three-quarters majority of the council will vote for the removal of General Booth and subsequent reorganization.

At international headquarters those who are supporting General Booth refused to concede a possible victory to the other camp, saying that they were sure of at least seven votes, and that they believed the council would vote confidence in the general to continue his leadership.

They said, however, the method of choosing a successor, and other administrative reforms, might be effected, and that even certain of those who would support the general would favor this.

Vancouver Adds To Official Population

Suburbs Have Been Absorbed By Coast Metropolis

Vancouver.—The pandemonium which welcomed the New Year also marked the beginning of a new Vancouver. This city added some 80,000 to its official population at the first stroke of 12. The hitherto separate municipalities of Point Grey and Vancouver South merged with Vancouver proper to form one metropolis with a population of 220,883, according to figures drawn up in a survey completed in December, 1927.

A local directory, however, places the total population at 277,680. According to the lower estimate, Vancouver brought in a population of 142,150, South Vancouver 45,500, and Point Grey, 33,233. Thus this Pacific gateway, which less than half a century ago was but a settlement, has reached a position where it lays claim to being Canada's third city. The next Dominion census will officially place the honor as between Vancouver and Winnipeg.

EFFICIENCY OF NEW COMBINES AMPLY PROVEN

Ottawa.—Contributing to the progressive transition of Canada's farming industry, one of the more recent labor-saving devices, the reaper-thresher, or "combine" is playing an important part, according to E. S. Archibald, director of Dominion experimental farms.

Latest statistics, compiled by the federal department of agriculture, show that more than \$12,000,000 have already been invested in this new harvesting machine by farmers of the prairie provinces. It is also estimated that more than 3,500,000 acres of grain were cut and threshed during 1928 by the new method.

Saskatchewan, the premier grain producing province of the Dominion, leads in the number of combines in use with a total of 2,356. In Alberta 1,095 machines were in operation, while 206 were introduced in Manitoba.

Exhaustive experiments with the combine have been conducted by the federal department. Data has also been collected from owners scattered throughout the Dominion. From this information it has been established that very little trouble is being experienced in operation of the combines and that grain kept without loss in grade or milling quality.

The survey further revealed that harvesting with combines resulted in an approximate saving of eight or nine cents per bushel. A number of owners reported a saving of grain averaging 2.96 bushels per acre and that better grades were received than for binder harvested grain. A few received lower grades, while the majority of users noted no difference.

The canvass indicated that weeds caused delays in some sections. Several operators, however, stated that burning of combine stubble and straw had rendered the succeeding crop free from weeds and in several instances had increased the yield from two to six bushels an acre.

Resolutions Urge The Establishment Of Air Mail Service

Mystery Of "Crank" Letters Cleared Up

Were Traced To Clerk In New York Post Office

New York.—The arrest of Abraham Rosenberg, 27, a clerk in the main post office here, has cleared up the mystery of "crank" letters received in the last few years by President Coolidge, Vice-President Dawes, former Governor Smith, and other dignitaries, postal authorities announced.

Postal inspectors said they found 1,200 letters, all of a threatening nature, at Rosenberg's home.

Rosenberg dropped his last letter down a chute in the main post office. It was traced to him and the threatening letters were found in his home. Rosenberg, postal men say, threatened "action" after such developments as the sinking of the submarine S-4.

Change Name Of Ancient City

Peking, China, Now To Be Known As Peiping

Peiping, China.—The Nanking government post office department has changed the name of the ancient city of Peking, which is now known as Peiping.

The name Peking signified "Northern Capital," and the Nanking government did not wish that meaning to be applied to the city from which Northern arms had been driven.

At first the spelling adopted was "Peiping," pronounced "Bay Ping," and meaning "Northern Peace." It was later ruled that Peiping would be correct.

Senate Editor To Retire

Albert Horton Quits Office After Fifty Years' Service

Ottawa.—After half a century of service, Albert Horton, editor of Senate debates in Canada's parliament is to retire shortly, it was announced recently. He will be succeeded by David Halpin, at present of the Senate Hansard staff.

Mr. Horton has been a familiar figure on parliament hill since he was brought here in 1877 by Hon. George Brown, to report the proceedings in the Senate for the Toronto Globe.

SUNDAY SCHOOL LESSON

JANUARY 13

SIN

Golden Text: "If we say that we have no sin, we deceive ourselves, and the truth is not in us. If we confess our sins, he is faithful and righteous to forgive us our sins, and to cleanse us from all unrighteousness."—1 John 1:8, 9.

Lesson: Genesis 3:1-24; 6:5-8; Mark 7:14-23; Romans 1:18-32; 2:10-15; 1 John 1:5 to 2:6.

Devotional Reading: Psalm 51:1-10.

Explanations and Comments

What God Is, and What We Should Be, 1:5, 6.—The message which John had received from Christ (see verses 1-3), and which he now hands on, is that God is light, and in Him is no darkness (moral darkness, i.e. sin) at all. "Light, as here contrasted with darkness, means not intellectual illumination, but ethical perfection. It describes the absolute purity and holiness of God as he has been revealed in Christ."—A. S. Penke. God is spirit (John 4:24); God is light (1 John 1:5); and God is love (1 John 4:8). "Spirit, light, love are not mere attributes, they are Himself. They are probably the nearest approach to a definition of God that the human mind could frame or comprehend. The more we consider them, the more they satisfy us. The simplest intellect can understand their meaning; the subtlest cannot expound it."—A. Plummer.

It is not possible to live in sin and at the same time to enjoy the fellowship of God, John next declares "Walk" in this verse 6, is a familiar figure of speech, meaning one's customary conduct. "Do not the truth" means do not live in harmony with the demands of truth. "The life as well as the statements of the lips are false."

"A life in moral darkness can no more have communion with God, than a life in a coal-pit can have communion with the sun."—A. Plummer.

The Atonement For Sin, 1:7.—If we walk in the light, as He is in the light (we walk; God is; we move through space and time; he is eternity); we have fellowship one with another (the nearer we are to God, the closer is our fellowship with one another).

"While we walk with God in light, God our hearts doth still unite; Dearest fellowship we prove, Fellowship in Jesus' love."—Charles Wesley.

Calgary, Alta.—Resolutions requesting that the post office department should establish an air mail service in Western Canada connecting all the principal cities, and that the Dominion Government should help to bear the expense of lighting air ports, which would result from air mail service, were passed at the air conference held here, at which seven western cities were represented.

Tariffs for both visiting planes and those with headquarters in these cities were arranged, while the cities laid down a uniform policy with regard to companies and private individuals taking leases for accommodation on municipally owned aerodromes.

Final control of all municipally-owned airports will remain with the municipalities, it was decided, even though the cities hand over the administration of the flying fields to official aero clubs.

The following were present: Mayor F. E. Osborne and Commissioner A. G. Graves, representing Calgary; Mayor A. U. G. Bury, of Edmonton; Commissioner J. Leslie, of Saskatoon; T. J. Emerson, of Moose Jaw; Mayor I. Bullivant, of Medicine Hat. Regina was represented by George M. Bell, of Calgary, while Emil Sick, also of Calgary, represented Lethbridge.

The conference was attended by J. B. Corley, district superintendent of the post office, Capt. Fred McCall, of the Great Western Airways, and D. K. Yorath, of Calgary Aero Club.

In discussing the possibility of re-establishment of the air mail service, Mr. Corley stated that in his opinion night flying was necessary, and that it had come to be the accepted thing in the United States.

Conditions on the prairies were as good as anywhere in Canada, Mr. Corley stated, and it had been shown in the test recently conducted that 24 hours could be saved in the transcontinental journey provided that planes were able to make train connections.

The test period had been an experiment to try out the possibilities of winter flying with mail, Mr. Corley went on, but should re-establishment of the service be considered it would be necessary for the cities to prepare for night flying.

Mayor Osborne pointed out that lighting facilities would not be required either for commercial companies or private flyers at the present time, but would be provided solely for the use of aeroplanes carrying mail for the post office department.

Cold Hits Southern Europe

First Heavy Storm Of Winter Causes Several Deaths

Paris.—Many deaths were reported as Southern Europe, particularly France, struggled against the first severe storms of the winter.

Trains were delayed, shipping impeded and many roads and mountain passes made impassable by rains and snows which in most instances were accompanied by high, violent winds. Four persons died of the cold in Paris and two deaths were reported from Lyons.

The Algerian packet boat Governor-General Jonnart, arriving at Marseilles, reported that three passengers were washed overboard during a storm on the Mediterranean.

Students May Make Change

Toronto.—The scheme whereby University students may exchange from one Canadian university to another for one year of the course will come into effect in 1929, according to L. J. Green, president of the National Federation of Canadian University students which recently held its annual convention at Kingston.

New Hotel Is Assured

Saskatoon, Sask.—Definite assurance of construction of a new C.N.R. hotel, consistent in size and character with the needs of the city of Saskatoon, was contained in a telegram received by Mayor G. W. Norman, of Saskatoon, from Sir Henry Thornton, president of the Canadian National Railways.

Looking For Work

Detroit.—Milling about the employment office of the Ford Motor Company, at Fordson, a crowd estimated at 32,000 men, responded to the announcement of the company that 30,000 additional men would be employed.

A STEADY GROWTH

For more than twenty-two years this farmer's company has been growing, as it will continue to grow, in strength and capacity of service.

That is one convincing proof of the value and usefulness that Western farmers find in United Grain Growers.

UNITED GRAIN GROWERS LTD.

Elevators at: Gleichen, Arrowood, Cluny, Stobart, Shouldice and Namaka

NEW DEPUTY MINISTER OF TELEPHONES APPOINTED

Jas. D. Baker, who for the past eight years has been plant superintendent, has been appointed to the position of general manager of the Alberta Government Telephone System and Deputy Minister of Telephones to succeed R. Bruce Baxter who recently resigned to become general manager of the Calgary Power Co. Mr. Baker's connection with the service extends over the past 22 years and his promotion comes as a recognition of seniority as well as ability. The appointment is regarded with general approval within all departments of the government service. The position vacated by Mr. Baker has been filled by the appointment of W. C. Bruce, who has been traffic superintendent, his position being taken by the promotion of W. B. Ferguson, commercial engineer in the department.

FOODS FROM WOOD

It is now possible to chemically transform wood into food on a commercial scale, according to Dr. Bergius, the noted German chemist, now visiting America.

He states that though researches covering the last 12 years carbohydrate suitable for human consumption have been artificially produced from wood. Cattle feed also has been made from material heretofore wasted on the farm.

Dr. Bergius is one of the world's greatest chemists and is the discoverer of a process for making synthetic gasoline from coal, which has given him international fame. Much of the experimental work done in connection with his gasoline pro-

MISS BLANCHE CARIGAN

There is much regret throughout the Ouelletteville district over the death of Blanche Carigan, aged 21 years, who passed away in a Calgary hospital, after an illness of only two days, where she had been attending business college for six weeks previously. Besides her father and mother she leaves to mourn her demise her brother James and a great number of friends. The funeral services were conducted by Father Rioux at the Cluny Mission church and the remains laid to rest in the Gleichen Catholic cemetery to where a long procession of friends and the mourners followed. The many beautiful floral contributions from friends were carried by Misses A. Laprice, M. Creftin and M. Gourdinne.

NAVY LEAGUE DOES VALUABLE WORK

Fred Cooke, organizing secretary of the Navy League of Alberta, who has been in Gleichen collecting subscriptions to Canada's national magazine of Yachting and Shipping and donations to the Navy League, wishes to thank the citizens for their assistance.

The Navy League of Canada assists the widows and orphans of the men of the Merchant Marine and their dependents. The league also supports the sailors' homes and institutes, etc., in all the larger Canadian ports and looks after the welfare of the seamen while they are ashore. In addition to this, the league trains young men and boys, helping to make better Canadian citizens of them.

Canada's national magazine of Yachting and Shipping is fast becoming one of the leading Canadian magazines and it should be in every home and institution in Canada. It is published monthly.

CARD OF THANKS

We wish to thank the many friends and neighbors for the kindness and sympathy shown us during the illness and death of our Father.
 The Green Family.

Wonderful fine weather throughout the past two weeks, with just enough snow to keep down the dust and supply drink for the live stock on the range.

Mme. Madeline Malherbe of Bordeaux, France, died at the age of 103, the same age at which her mother passed away.

SUCCESSFUL SEASON IN SUGAR BEET INDUSTRY

Over 100,000 bags of sugar have been manufactured during the past season in the plant of the Canadian Sugar Factories Limited of Raymond, according to a recent announcement by the manager, T. Geo. Wood. It is estimated that the expenditure made yearly in this industry in Alberta averages over \$650,000, the factory employing during its peak of production from 250 to 300 men. Approximately 37,000 tons of beets were harvested and growers have received an initial payment of \$7 per ton which it is expected will be supplemented by further payments during the winter months. A total price of \$8.16 per ton was paid for beets delivered to the factory in 1927. During the past season an average yield of 7.5 tons per acre was secured, the beets having an average sugar content of 17.2%. Mr. Wood in his statement expresses the belief that the acreage sown to beets in 1929 will exceed that in any previous year.

Success has been of value in his food experiments.

Patient work of scientists in the bearing fruit in new discoveries which tend to eliminate wasteful methods and increase the usefulness of raw materials. So rapid are these developments that many industrial practices of one decade become obsolete in the next, and expensive plants must be scrapped to make way for those that are now and more efficient. But that is the price of progress.

Town & District

Do you write it 1929.
 Be a booster during 1929.
 Look at the label on this paper.
 Does your label read Dec. 31, 1929?

If your label does not read 1929 there is something wrong?

The hockey boys should feel greatly encouraged and go right in to win.

Calgary is looking around for an amateur hockey team to meet our Home-Brew.

Quite a number of cases of measles are reported north of town and one in town.

The Blackfoot Indians are spending another nice wheat payment in Gleichen today.

Our Home-Brew Hockey boys are still making good and the envy of many another town.

Last week the Call took a holiday for the first time in over three years—hope we will be forgiven.

Mr. and Mrs. Chris Bartsch are spending a few days in town on business and meeting a number of their friends.

Most of the stores report a good Xmas, business, particularly the last couple of days before the festivities started.

Nanton comes eighty miles today to try their luck against our Home-Brew hockey boys—they will have to go some tonight.

Mrs. Brereton, with Miss Alice, is visiting her daughter Mrs. Basil Payne, and their numerous friends are glad to meet them.

The holiday festivities in town passed off quietly at Gleichen, owing to many being ill, but there were many pleasant home gatherings.

Gleichen theatre goers are to have the opportunity of seeing two of the greatest motion pictures yet produced. "Ben Hur" will be at the Community Hall on Jan. 14th and "The Big Parade" on Feb. 18th.

Mr. Egar, of the Soldier Settlement Board, has left application forms for Farm Help with the Royal Bank of Canada, U.G.G. elevator, Alberta Pacific elevator and the Alberta Wheat Producers. Farmers desiring farm help for spring work will do well to get in touch with their agents, at these points and get their applications in early.

Elsewhere will be found the large advertisement of Ramsay Mercantile Ltd. great sale, and we can assure our readers if they visit this sale they are in for a real treat in bargains. Ramsay Ltd. wish it clearly understood they are not quitting business, but changing the principal in way of conducting business, as on Feb. 1st, they will open with a new stock and conduct the business on strictly cash basis. But to make room for the new stock, everything is to be sacrificed at such prices that will save you money on mail order prices and keep your money at home. So be a booster—trade at home.

Adjutant and Mrs. Norberg, who have been in charge of the Eventide Home at Gleichen for the past year and a half leave this afternoon for Panama City, Panama, by way of Winnipeg and Montreal. During their stay in Gleichen they have made many friends for themselves, who very much regret their departure and wish then all things good in their new home in the far south. They are succeeded by Ensign and Mrs. Kanner, from the Edmonton Eventide Home, who have had a number of years experience in this work of the Salvation Army, and who will undoubtedly prove splendid additions to this town. They have already arrived in Gleichen and Adjutant Stewart is here from Edmonton superintend the change.

The farmer's best friend is the Family Herald and Weekly Star, Montreal. It costs only a dollar a year, and the family circle gets a superb magazine free.

Quite a few are suffering from severe colds in town and district and a few cases of flu are reported, while some have been quite ill none are reported dangerous.

ANNOUNCEMENT
